

# Temperature Control Solutions

## Exceptional Capabilities

Aggreko's ability to create custom-designed temperature control solutions is unmatched. With expertise in the temperature control industry, our people tailor unique solutions around your specific needs, regardless of the location or time. From mobilizing over 1,300 tons of cooling equipment on site within 24 hours for a grocery distribution center to maximizing production for a chemical plant through dense air injection and much more, we have the experience, skill and specialized fleet of equipment to get the job done right, right now. Aggreko delivers greater control of productivity, enhanced product quality, and increased quantity to give you the competitive advantage.

## High Performance Equipment

### Heat Exchangers

Constructed of carbon and stainless steel, these units range in size from 200 to 7,200 square feet. They can be used to extend the operating parameters of pressure- or fluid-related processes.

### Low Temperature Process Chillers

These units are capable of obtaining temperatures as low as -40° F in water- and air-cooled machines, and can be tailored to specific process applications with individual sizes from 30 to 1,000 tons.

### Heaters

These fume, flame and moisture-free electric heaters are available in sizes from 20kW to 150kW with air flows to 12,000cfm and temperatures to 300° F.

### Dehumidifiers

Desiccant dehumidifiers are available in sizes from 1,000 to 10,000cfm with fridge-drying packages also available to 30,000cfm.

### Boilers

Mobile steam systems consisting of both firetube and watertube boilers ranging in size from 30hp to 75,000hp and a variety of pressures from 15 to 700psi.

### Chillers

Environmentally friendly water and air-cooled chillers are available in sizes from 30 to 1,000 tons and can be used for HVAC.

### Air Conditioners

A fleet of heavy-duty air conditioners offers individual units up to 60 tons, capable of over 12,000cfm of 45° F air.

### Cooling Towers

A complete line of patented modular cooling towers is available, with systems from 500 to 200,000 GPM.

### InstaCool

One, three and five-ton InstaCool units provide efficient mobile cooling with hassle-free installation.

For over four decades, Aggreko has provided rental energy solutions that go above and beyond industry standards. We bring a world of experience to each and every job, led by people with unequalled expertise within the industries we serve. Through innovation and a commitment to continuously developing new solutions and enhancing service options, we ensure a higher level of performance. And, with 50 locations in North America and 120 locations worldwide, our 24/7/365 service is available where you are.
